

# TOWN OF SPEEDWAY

## **FOR IMMEDIATE RELEASE**

Tuesday July 19, 2016

The town of Speedway is working with Crystal Clean regarding today's events. We will continue to closely monitor and provide updates as we receive them.

Please see the statement below from Crystal Clean.

## **PUBLIC STATEMENT OF HERITAGE – CRYSTAL CLEAN, LLC REGARDING ODORS IN INDIANAPOLIS ON JULY 19, 2016**

Tuesday, July 19, 2016, 4:30 PM CST: Heritage – Crystal Clean, LLC (HCC) is aware that natural gas odors have been detected in the Indianapolis area today. We are providing this statement to share our current understanding of this incident with the local community.

HCC operates a used oil recycling facility located on Tenth Street. We are committed to operating in compliance and being a good neighbor.

This morning we restarted our facility following a routine semi-annual shutdown. We notified a local utility and a government agency of an air release in connection with the facility restart. We do not believe that this shutdown and restart of our facility is connected to the odor problems reported throughout Indianapolis today, due to the nature of the odors and the geographic location where the odors were reported.

Consistent with our past practices, we intend to continue our investigation and will provide updates as appropriate.
