## **Marathon Pipe Line LLC**

539 South Main Street  
Findlay, OH 45840  
Telephone: (419) 422-2121

Marathon Pipe Line LLC (MPL) will start vegetation maintenance activities within its pipeline right-of-way (ROW) on October 2 in the Town of Speedway along the south side of Crawfordsville Road and the abandoned P & E railroad track. MPL's project will take several weeks and will consist of removing any trees within the ROW.

Keeping the ROW clear of trees and overgrown vegetation is necessary to ensure a safe pipeline. By law, MPL and its contractors must be able to inspect the pipeline and easement at least 26 times per year, and be able to access the pipeline and ROW in the event of an emergency or for maintenance activities. Keeping the ROW clear also helps protect the pipeline and its coating from tree root damage, which can diminish the effectiveness of the corrosion control system on the pipeline. The ROW consists of 25 feet on each side of the pipeline, which allows for an unobstructed easement.

MPL will work to ensure the work is completed quickly and safely, and has made available a land agent who will contact individual property owners adjacent to the ROW. If you have any questions or concerns, please contact MPL Right-of-Way Specialist Andy Oswalt, at 419-429-5496.

*Note from Jacob Bladsel: Speedway is working with Marathon Pipe Line to add alternate landscaping along the trail that will not affect their pipeline.*
